1430 – 1530	<b>Managing Virtual Environments</b> <i>Stephen Foley, Microsoft Corporation</i> Learn about datacenter optimization technologies using a mix of physical and virtual systems with a single integrated management solution. We will demonstrate and discuss how to create and manage a flexible datacenter.	<b>Air Combat Command (ACC): Approach to Unified Communications &amp; Collaboration (UC)</b> <i>John Famolari, Microsoft Corporation</i> <i>LtCol John Keffer, USAF ACC HQ ACC/A6CK, U.S. Air Force</i> ACC's UC vision is designed to create an operating environment which provides the AF Warfighter a set of adaptive, secure and federated capabilities that will advance their ability to communicate and collaborate consistently across the AF & DoD operational units. ACC will enhance Warfighter effectiveness through seamless, secure and survivable unified communications and collaboration services. ACC is currently building a UC roadmap for the synergistic convergence of fixed and mobile voice, video, messaging and collaboration services across AF, Joint, Coalition and civilian partners.
1530 – 1630	<b>Office 2010 and the Enterprise Suite</b> <i>Thom Oaks, Microsoft Corporation</i> <i>David Quart, Microsoft Corporation</i> Learn about the exciting new features in Office 2010 that will enable end users to be more productive and work more efficiently. Understand how users can still be productive even when they are in a deskless or disadvantaged environment. At the end of this session, you'll fully understand how Office 2010 and the Enterprise suite provide an innovative and cost effective working environment.	<b>Using Dynamics CRM for Developing High Productivity Line of Business Applications</b> <i>Wende Nossaman, Microsoft Corporation</i> <i>Keith Winderlich, Microsoft Corporation</i> This session will discuss how to leverage Dynamics CRM/xRM to develop line of business (LOB) applications to give users insight into operations and better communicate with front line personnel. During this session we will show varied solutions developed using Dynamics CRM to include the latest Tasker Management Tracker (TMT), a publishing solution and the Distinguished Visitors & Legislative Affairs management solution.
1630 – 1730	<b>ADX Update</b> <i>Jim Loux, Microsoft Corporation</i> <i>MSgt Paul Bishop, NCOIC, AFNet Migration Team, Scott AF Base, U.S. Air Force</i> Sure you've probably heard "ADX" is an AFNET Active Directory and Exchange consolidation and migration effort, but if you ever wondered what goes into ADX preparation, execution and clean-up then this presentation is for you. Get the inside track on ADX from the people in the trenches that perform critical ADX mission related tasks daily to make it a success.	<b>Improving Program Management with Project Server</b> <i>Alban de Bergevin, Microsoft Corporation</i> US Air Force's wide variety of programs requires Program Management solutions that are both easy to use and scalable. Facilitating project collaboration, managing complex programs, providing executive dashboards will be among the topics covered.
